DETAILED ACTION

The following is a response after the Board of Appeals decision filed on October 27, 2005.

The Board of Patent Appeals and Interferences affirmed the rejection(s) against claim(s) 1-9 and 11 under the double patenting rejection, but reversed rejections against claim(s) 1, 5, 7-9 and 11 under the 102(b) and 102(e) rejections. Applicant has filed a terminal disclaimer to obviate the double patenting rejection and the disclaimer has been approved.

Allowable Subject Matter

Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-restricting engine output if a degree of change in a rotational state of a shaft detected during engine acceleration variations is excessive and will cause difficulties in a transmission system and in combination with all the remaining limitations of claims 1 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
